2012 Cost Containment Annual Report to the Illinois General Assembly

Pat Quinn Governor Andrew Boron Director of Insurance

Illinois Department of Insurance

PAT QUINN Governor ANDREW BORON Director

To the Honorable Members of the General Assembly:

The Illinois Insurance Cost Containment Act requires the Director of Insurance to submit an annual report to the General Assembly containing an analysis of portions of the Illinois insurance market and a recommendation of the most appropriate and comprehensive cost containment system for the state (Article XLII, 215 ILCS 5/1202d).

In accordance with Section 1202 of the Illinois Insurance Code, [215 ILCS 5/1202] I am pleased to submit the Annual Report to the General Assembly on Insurance Cost Containment for 2012. It contains significant information from a national and Illinois perspective regarding the current conditions of the property and casualty insurance industry.

Sincerely,

Andrew Boron

Director of Insurance

OVERVIEW

Section 1: OVERALL PROPERTY / CASUALTY INDUSTRY SUMMARY

This section provides and compares details of the Illinois property / casualty marketplace to nationwide data. It also provides a breakdown of all property / casualty premiums written on a regional basis and by significant line of business within Illinois.

Section 2: INDIVIDUAL LINE OF COVERAGE ANALYSIS

This section provides a detailed review of each of the following areas of insurance within the state of Illinois.

- Homeowners
- Private Passenger Auto Liability
- Private Passenger Auto Physical Damage
- Commercial Auto Liability
- Medical Professional Liability
- Other Liability
- Workers' compensation

One aspect of each line of business monitored by the Illinois Department of Insurance (Department) is market concentration. The Herfindahl/Hirschmann Index or (HHI) is a measure of the size of companies and is widely accepted as an accurate indicator of the amount of competition among individual companies in any given marketplace. The HHI is calculated by the summation of the squares of each company's individual market share. Generally, an HHI of 1800 or above is an indication that the given market may be highly concentrated and may be approaching anti-competitive behavior.

Section 2 contains a historical graph of the (HHI) for each of the lines of business indicated above. For all of the lines studied only the medical professional liability line continues to be considered highly concentrated in Illinois. This situation is not new and continues to be monitored by the Department.

Section 3: RESIDUAL MARKET MECHANISMS

Residual Market Mechanisms are established to provide specific insurance coverages to Illinois consumers who are unable to buy coverage in the open or voluntary markets. Coverages available to Illinois consumers through residual markets include property coverage, automobile coverage, and workers' compensation coverage.

The residual markets (FAIR Plan, Auto Plan, and Workers' compensation Assigned Risk Pool) all have very small market shares, indicating insurance needs are being met by the voluntary market. The Workers' compensation market share continues to be the largest at 2.6 percent of the market based on written premium and has experienced a decline every year since 2003.

In addition to residual market mechanisms, Section 3 details information related to the surplus lines markets. The report reflects nothing of concern with the Surplus lines

market mechanisms. The Department however, has limited regulatory authority regarding coverage placed in the Surplus lines market.

Section 4: OVERALL MARKETPLACE CONDITIONS

Lastly, the report identifies and examines several financial principles that are generally accepted measurements of market reliability and profitability. The Department recognizes that economic and market conditions during 2008 had dramatic effect on the short term profitability of the Property & Casualty insurance industry in Illinois. All indicators for 2010 appear to continue the positive trends experienced in 2009. The Department will continue to monitor all available data related to the Property & Casualty insurance industry to encourage a healthy, competitive, and reliable insurance market remains available for all Illinois consumers.

SECTION 1: OVERALL PROPERTY / CASUALTY INDUSTRY SUMMARY

The following table provides a breakdown of total direct written premium and incurred losses for the property / casualty industry by state for the past 5 years.

Direct written premium in Illinois totaled \$18.97 billion in 2010, representing 5.3 percent of the total written premium nationwide. Additionally, for a second straight year the overall loss ratio for Illinois Property / Casualty coverage experienced a decrease in 2010. The loss ratio has decreased from 66.7 percent in 2008 to 65.2 percent in 2010.

^{*} Direct Pure Loss Ratio is calculated by dividing losses incurred by direct earned premium. Source: NAIC State Data Network; aggregate Schedule T for all property/casualty insurers.

The following map indentifies the percentage of total written premium and loss ratio for the property / casualty industry in ten regions of the United States during 2010 as well as the 5-year average.

Distribution of Direct Written Premium & Loss Ratios by Region

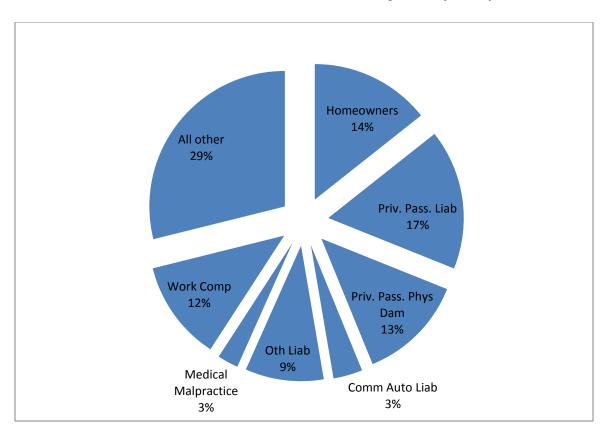

2010	Pacific	Mountain	Northwest Central	Southwest Central	Northeast Central	Southeast Central	Mid- Atlantic	South Atlantic	New England	Other*	Total All Regions
% Total DPW	14.6%	6.8%	8.2%	9.3%	15.4%	5.1%	14.9%	19.9%	4.5%	1.3%	100.0%
Direct Loss Ratio	54.9%	68.2%	58.9%	57.9%	64.4%	62.7%	66.0%	60.1%	55.6%	73.1%	61.2%
Loss Ratio – 5 year average	53.4%	59.7%	61.3%	61.7%	62.7%	59.7%	66.6%	56.9%	52.2%	57.1%	59.4%

^{*}Other includes Puerto Rico and the U.S. Virgin Islands, Canada, American Samoa, Guam and N. Mariana Islands

Historically, significant weather activity has contributed to an above average loss ratio in each of the southern regions. Recent reductions in the severity and frequency of storm activity in the Gulf of Mexico have reduced the 5 year average loss ratio for these regions to levels comparable to the other regions of the United States.

The following graph reflects the distribution of all Illinois property / casualty insurance premiums written during 2010. Personal lines of insurance include homeowners, private passenger automobile liability, and private passenger automobile physical damage coverage. Combined, these coverages make up approximately 44 percent of the overall property / casualty insurance written in the state of Illinois.

Percent of All Property/Casualty Premiums Written in Illinois by line (2010)

SECTION 2: INDIVIDUAL LINE OF COVERAGE ANALYSIS

HOMEOWNERS

The following table compares homeowners' insurance written in Illinois to the nationwide market. For the third year in a row, the amount of written premium in Illinois continues to increase at a greater rate than premiums written nationally. In 2010, total written premiums for homeowners' coverage written in Illinois rose by 5.75 percent from 2009. Nationally, total written premium for all homeowners' coverage rose by 4.9 percent during the same period.

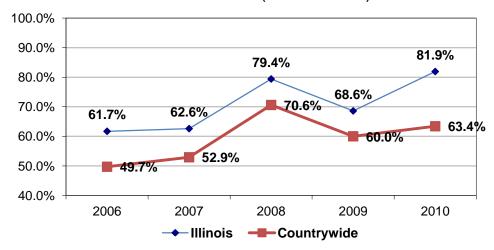

Homeowners' Underwriting Results (2010)

Homeowners (\$000 omitted)	Illinois*	Nationwide**
Direct written premiums	2,742,553	51,382,746
Direct earned premiums	2,672,900	50,089,366
Expenses (% premium)		
Incurred losses	81.9%	63.4%

Taxes, licenses & fees	1.3%	2.4%

^{*} NAIC State Data Network, 2010 Illinois State Page Exhibit

The following chart provides a comparison of incurred losses for homeowners' insurance over the past 5 years. As indicated below, the loss ratio for both the Illinois and nationwide markets experienced an increase during 2010. Incurred losses in Illinois increased approximately 13.3 percent during 2010 while nationally incurred losses rose by 3.4 percent.

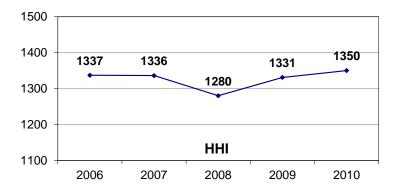

Homeowners' Losses as a percent of Earned Premiums (2006 - 2010)

^{**} NAIC State Data Network 2010 Insurance Expense Exhibit Part III

The following graph reflects the HHI for Illinois homeowners' insurance from 2006 through 2010. As the following chart shows, the homeowners' insurance market available to Illinois consumers continues to exhibit a healthy, stable level of competition for Illinois consumers. Based on the data available, Illinois homeowners are being served by a competitive voluntary insurance market.

The following table identifies the top ten writers of homeowners' insurance in Illinois based on written premium in 2010. In summary, the ten companies identified wrote over 1.9 billion dollars in written premium and combined for a total of 70 percent of the total Illinois market share in 2010.

Top 10 Homeowners' Insurers in Illinois

Company	2010 Written Premium	2009 Written Premium	2010 Market Share	2009 Market Share	2010 Loss Ratio	2009 Loss Ratio

Homeowner Coverage Descriptions

Homeowners' Insurance is generally purchased in one of several standard coverage types. The coverage types acknowledged as industry standards include HO-1, HO-2, HO-3, HO-4, HO-5, HO-6, & HO-8

- Basic Form (HO-1) The most basic coverage type providing coverage against 11 specific factors or perils: fire, lightning, smoke, vandalism, theft, ice, snow, windstorm, hail, riot, and volcano eruption. The popularity of this policy has diminished over the years due to the policies extensive coverage gaps.
- Broad Form (HO-2) HO-2 policy forms are also considered a basic coverage form but with a wider scope of coverage than the HO-1. Coverage under an HO-2 policy is limited to 17 perils specifically listed in the policy.
- Special Form (HO-3) Offers property and liability coverage for the dwelling, other structures, and loss of use of the dwelling and other structures for all perils specifically listed in the policy (e.g., fire, lightning, windstorm and hail, falling objects, etc.). Personal property is also covered for perils listed in the policy. HO-3 covers more perils than an HO-2 policy.
- Tenants Form (HO-4) Provides coverage for a renter's personal property,

liability, and additional living expenses.

- Comprehensive Form (HO-5) Covers your home and personal property for everything that is not specifically excluded in your policy. This type of policy provides the broadest coverage available but is not offered by all insurers and is usually more expensive. Personal property coverage under an HO-5 is generally broader than an HO-3 policy.
- Condominium Form (HO-6) Covers a condominium owner's personal property and any additions and alterations made to the inside of the owner's unit. Condominium owners can also buy endorsements to protect property and for liability associated with their shares in the condominium association's common ownership.
- Modified Coverage Form (HO-8) Provides coverage when an older home's replacement cost far exceeds its market value. This form allows the policyholder to carry lower limits of insurance rather than try to maintain 80% of replacement cost. The HO-8 policy provides varying methods of loss payment depending on whether the damaged or destroyed building is repaired or replaced.

The following table summarizes the amount of written premium paid by Illinois homeowners' during 2010 for each of the coverage types identified above.

Type of coverage	2010 Illinois Premium	Market Share
HO-1	23,577,183	1.0%
HO-2	70,460,436	2.9%
HO-3	1,077,443,033	43.9%

Def. & cost cont. exp. Incurred	0.4%	0.3%
Comm./brokerage	10.3%	8.4%
Taxes, licenses & fees	1.1%	2.2%

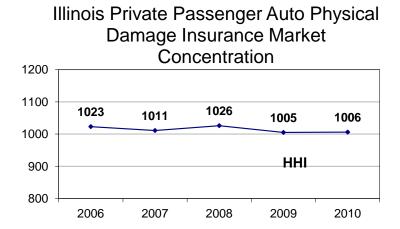

^{*} NAIC State Data Network, 2010 Illinois State Page Exhibit

As with prior years, the loss ratio for private passenger physical damage coverage experienced by Illinois consumers continues to be essentially identical to the loss ratio experienced by consumers nationwide.

^{**} NAIC State Data Network 2010 Insurance Expense Exhibit Part III

As private passenger liability insurance and private passenger physical damage are closely associated and generally marketed jointly the market concentration of the two lines of insurance should be closely related. As reflected in the following chart, Department research continues to indicate Illinois consumers are experiencing a competitive automobile physical damage market.

The following table identifies the top ten writers of private passenger physical damage insurance in Illinois based on written premium in 2010. In summary, the ten companies identified wrote a total of over 1.52 billion dollars in premium and combined for a total of 63 percent of the total Illinois market share in 2010.

^{*} NAIC State Data Network, 2010 Illinois State Page Exhibit

As reported with other lines of insurance examined in this report and summarized below, the loss ratio experienced by Illinois consumers in the commercial automobile liability market does not appear to be significantly different from similar markets throughout the nation.

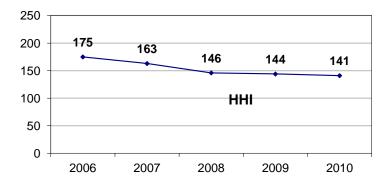

^{**} NAIC State Data Network 2010 Insurance Expense Exhibit Part III

As reflected in the following graph, the low and stable HHI indicates a competitive market is available for commercial automobile liability insurance in Illinois.

.

Illinois Commerical Auto Liability Insurance Market Concentration

The following table identifies the top ten writers of commercial automobile liability insurance in Illinois based on written premium in 2010. In summary, the ten companies identified wrote a total of approximately 189 million dollars in premium and combined for a total of 28 percent of the total Illinois market share in 2010.

MEDICAL PROFESSIONAL LIABILITY

The following table compares underwriting results for medical professional liability coverage written in Illinois with that written countrywide during 2010. As with several of the previous lines, the medical professional liability markets continued to see reduction in premium volume during 2010. The reduction in written premium for the Illinois market was approximately 23.6 million dollars or approximately 5 percent from 2009. Countrywide, the reductions totaled approximately 137.7 million or 3.2 percent from 2009 totals.

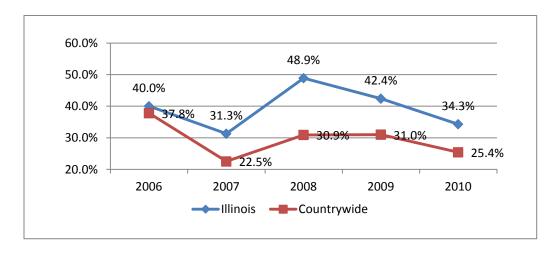

Medical Professional Liability Underwriting Results (2010)

Medical Professional Liability (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	471,049	4,297,404
Direct earned premiums	472,984	4,304,158
Expenses (% premium)		
Incurred losses	34.2%	25.4%
Def. & cost cont. exp. Incurred	26.5%	19.3%
Comm./brokerage	8.1%	8.7%
Taxes, licenses & fees	1.9%	2.1%

^{*} NAIC State Data Network, 2010 Illinois State Page Exhibit

As indicated below, the loss ratio for the medical professional liability market continues to improve both nationally and within Illinois. It should be note that the loss ratio for the Illinois market decreased by 8.1 percent compared to a national reduction of 5.6 percent during 2010. It should be noted that the defense and cost containment expenses incurred are far more significant in the medical professional liability line of business. These costs are not reflected in the following graph.

Medical Professional Liability Losses as a Percent of Earned Premiums (2006 – 2010)

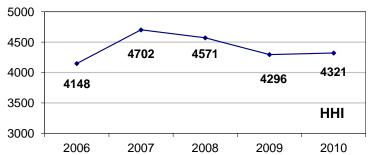

^{**} NAIC State Data Network 2010 Insurance Expense Exhibit Part III

The following graph highlights the market concentration for medical professional liability carriers in Illinois between 2006 and 2010. Consistent with most states, the largest writer of medical professional liability insurance in Illinois remains a physician-affiliated company. In Illinois that provider is ISMIE Mutual Insurance Company, which wrote 64.8 percent of the medical professional liability coverage in 2010. The second largest medical professional liability insurer, by direct written premium, was American Physicians Assurance Corp., which wrote 6.85 percent of the Illinois market.

As reflected below, the Illinois medical professional liability market remains a highly concentrated and potentially anti-competitive market. All insurers currently writing Medical Professional Liability insurance in Illinois must file their rating material with the Department. To encourage increased competition within the market all rate filings are publicly available on the Department's website at: http://insurance.illinois.gov/medmal/.

Illinois Medical Professional Liability Insurance Market Concentration

The following table identifies the top ten writers of medical professional liability insurance in Illinois based on written premium during 2010. In summary, the ten companies identified wrote a total of approximately 424 million dollars in premium and combined for a total of 90 percent of the total Illinois market share in 2010.

^{*} NAIC State Data Network, 2010 Illinois State Page Exhibit

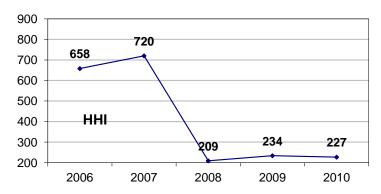

As illustrated in the following chart, the loss ratio for other liability insurance in 2010 was virtually unchanged from 2009 for both Illinois and on a national basis. In 2009, the loss ratio in Illinois was 8.2 percent higher than the national average. In 2010, the ratio for Illinois business was 8.7 percent higher the national ratio.

^{**} NAIC State Data Network 2010 Insurance Expense Exhibit Part III

As with all other lines addressed in this report, the Department has determined the HHI for the other liability market available to Illinois consumers. The following graph confirms that the market continues to be very competitive and that the current market regulation systems related to this line of insurance appears to remain appropriate for Illinois consumers.

The following table identifies the top ten writers of other liability insurance in Illinois based on written premium in 2010. In summary, the ten companies participating in the other liability market wrote a total of approximately 687 million dollars in premium and combined for a total of 39 percent of the total Illinois market share in 2010.

Comm./brokerage	7.5%	8.0%
Taxes, licenses & fees	2.3%	4.2%

^{*} NAIC State Data Network, 2010 Illinois State Page Exhibit

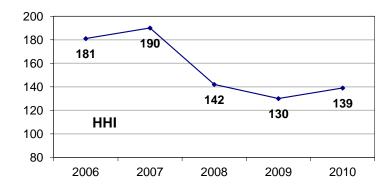

As illustrated below, the loss ratio related to workers' compensation activity in Illinois continues to remain higher than the national average. It should be noted however that the difference narrowed slightly from a difference of 16.6% in 2009 to 14.1% in 2010.

^{**} NAIC State Data Network 2010 Insurance Expense Exhibit Part III

As with all other lines addressed in this report, the Department has determined the HHI for the Workers' compensation market available to Illinois consumers. Based on available data it appears the Illinois Workers' compensation market continues to contain sufficient insurers to maintain a competitive market for Illinois employers.

Illinois Workers Compensation Insurance
Market Concentration

The following table identifies the top ten writers of workers' compensation insurance in Illinois based on written premium in 2010. In summary, the ten companies identified wrote a total of approximately 577 million dollars in premium and combined for a total of 26.6 percent of the total Illinois workers' compensation market in 2010.

SECTION 3: RESIDUAL MARKET MECHANISMS

States establish residual market mechanisms to provide coverage for consumers who are unable to buy coverage in the voluntary market. Illinois residual market mechanisms provide essential insurance coverage for the hard-to-place risk at rate levels approved by the Department. Illinois has residual market mechanisms for several areas of insurance including: property, automobile, and workers' compensation.

PROPERTY

The Illinois FAIR Plan Association (FAIR Plan)

Fire and homeowners' insurance may be placed directly through the Illinois FAIR Plan. Both personal and commercial insurance is available to consumers. Insurance companies share in the FAIR Plan's profits and losses in proportion to their voluntary market shares.

In Illinois, property insurance is widely available in the voluntary marketplace and only a very small percentage of consumers obtain coverage through the FAIR Plan. In addition, Illinois consumers are not at a coverage disadvantage when they buy insurance from the FAIR Plan, as is the case in many other states. In other states, residual market programs offer only dwelling fire or basic homeowners' policies. Illinois has one of the most progressive plans in the nation. Through the FAIR Plan, Illinois consumers can buy virtually the same coverages that are available in the voluntary marketplace, including guaranteed replacement cost, sewer back-up, earthquake, and building ordinance and law endorsements.

The following table summarizes the amount of dwelling and homeowner premium written by the FAIR Plan in Illinois from 2006 through 2010. As reflected in the following data, the consistently low markets share indicates the insurance needs of Illinois consumers are being met by the voluntary market.

Written Premiums for Illinois FAIR Plan (2006-2010)

	Amount of	AS % of lotal
	Written Premiums	Written Premiums
2006	\$7,018,505	0.28%
2007	\$6,047,739	0.23%
2008	\$5,258,275	0.19%
2009	\$5,193,870	0.20%
2010	\$5,542,885	0.20%

Source: Premium amounts provided by Illinois FAIR Plan

AUTOMOBILE

The Illinois Automobile Insurance Plan (Auto Plan)

Private passenger automobile risks are assigned to automobile insurers on a rotational basis in proportion to their share of the voluntary market. Assignments stay with the company and are not shared with other insurers. Commercial automobile risks are placed through servicing companies. Losses are divided among the voluntary writers of commercial automobile insurance in proportion to their share of the voluntary business.

The following table identifies the annual market share from 2006 through 2009 (latest data year available) for the Illinois Automobile Insurance Plan compared to nationwide data. The percent of written car-years is derived by dividing the number of written car-years insured through the residual market by the total number of written car-years insured through the voluntary market.

As indicated by the data, a comparison of the Illinois market share to the nationwide ratio reinforces the fact that the voluntary auto insurance market in Illinois is extremely effective.

Percent of Automobiles in the Illinois Assigned Risk Plan and the United States Composite Automobile Residual Market (2006-2009)

	2006	2007	2008	2009
Illinois	0.03%	0.02%	0.01%	0.01%
Nationwide	1.12%	1.00%	0.89%	0.87%

Source: AIPSO Facts 2009 (based on liability car-years)

WORKERS' COMPENSATION

The Illinois Workers' Compensation Assigned Risk Pool (Pool)

Several insurers act as servicing carriers for the Illinois Workers' Compensation Assigned Risk Pool. Losses are divided among the voluntary writers of workers' compensation in proportion to their shares of the voluntary business.

The following table highlights the percent of Illinois workers' compensation premiums written through the Pool between 2006 and 2010. As reflected in the following chart, the percentage of workers' compensation written thru the Pool continues to decrease.

Percent of Illinois Workers' Compensation Written Through the Pool (2006-2010)

	2006	2007	2008	2009	2010
Percent of Total	4.7%	4.0%	3.7%	2.8%	2.6%

Source: National Council on Compensation Insurance (NCCI)

All insurers who write workers' compensation insurance are assessed a fee to fund the Assigned Risk Plan. The Take-Out Program allows each insurer who removes an employer insured through the Plan to be eligible for a credit against their assessed fee. The following table compares total credits during 2009 and 2010.

One factor contributing to the recent reduction of credits is the decrease in amount of coverage placed through the pool. As more coverage is placed in the voluntary market, the Assigned Risk Plan has less coverage available for the Take-Out Program. As indicated by these findings, the Workers' compensation market continues to remains competitive at this time.

Illinois Take-Out Credit Results in 2009 and 2010

Year	Total Number of Policies Approved	Approved Credit
2009	5,974	\$28,584,489
2010	4,797	\$21,047,254

Source: National Council on Compensation Insurance (NCCI)

The following table ranks the top ten employment classes by the amount of premium written thought the Assigned Risk Plan. The majority of the classes identified below are consistently in the top ten coverages written through the pool. The only category new this year is Police Officers & Drivers, it replaced Taxicab Co: All other Employees & Drivers in the top ten classifications.

Illinois Residual Market Top Ten
Classification Codes by Premium Volume for 2010

SURPLUS LINES ASSOCIATION

Insurance placed in the Surplus lines market is written by a non-admitted (unlicensed) insurer through a licensed surplus lines producer. The licensed producer must exercise due diligence in protecting the insured since the Department has limited jurisdiction over unlicensed companies and the Illinois Insurance Guaranty Fund provides no protection for the consumer. Thus, it is the producer and not the Department who must determine

the company's financial stability and standards of management prior to submitting the risk.

The following table outlines the number of policies written in Illinois from 2006 through 2010 by surplus lines producers for homeowners, private passenger auto liability and physical damage, commercial auto liability, medical professional liability, and other liability coverage. The dramatic increase in policies written in the surplus lines market reported in 2009 is the result of a newly developed niche market providing indemnity coverages not normally provided by an automobile liability policy. In 2009, the number of policies written in the surplus lines market increased by 37.9 percent but the overall amount of written premium actually decreased by 7 percent during the same period. The dramatic increases during 2009 appear to have stabilized during 2010. The Department does not anticipate any further significant changes within the market.

As indicated above, the Department has limited regulatory authority over this market. The ability to determine the competiveness and health of the surplus lines market continues to be difficult to determine by the Department at this time.

Surplus Lines - Number of primary and excess policies written in Illinois (2006 - 2010)

Line of Business	2006 Illinois Policy Count	2007 Illinois Policy Count	2008 Illinois Policy Count	2009 Illinois Policy Count	2010 Illinois Policy Count
Homeowners'	352	357	385	644	1,049
PPA Liability	124	157	129	22,572	19,353
PPA Physical Damage	5,722	7,049	4,348	5,865	4,491
Commercial Auto Liability	148	121	149	166	277
Medical Professional Liability	940	1,160	1,084	979	1,134
Other Liability	25,696	29,001	26,414	26,157	26,255
Grand Total -all policies-	61,935	67,738	62,622	86,378	85,143

SECTION 4: OVERALL MARKET PROFITABILITY & FINANCIAL REGULATION

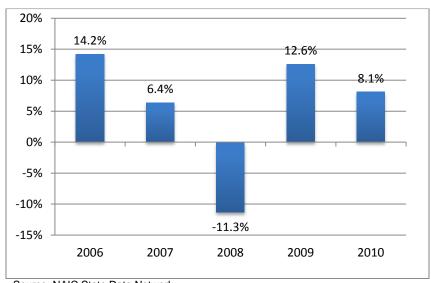

Businesses that provide a financial service must be financially sound. An insurance contract has little value to the insured if there is no guarantee that the insurance company will have the money to pay claims when needed. In determining whether the overall marketplace is viable the Department has considered a number of factors related to profitability and financial solvency.

PROFITABILITY

One measure of a company's financial performance is its profitability. Any for-profit organization must generate enough profit to survive and succeed. In a given month, if expenses exceed income reserve funds must be used to cover the difference. If the trend continues, reserve funds run out causing the business to collapse. Therefore, it is imperative that insurance companies manage income and expenses to assure profitability and survival. When the majority of insurers in the market are competitive and profitable, the market is considered to be financially strong. As with the economy as a whole; various indicators throughout this section appear to indicate some level of recovery in 2010.

One measure of overall profitability is change in policyholders' surplus. This ratio measures a company's ability to increase policyholder security. Policyholders' surplus is made up of: 1) underwriting gains or losses; 2) investment gains or losses; and 3) net contributed capital and other surplus changes. The following chart summarizes the change in policyholders' surplus for the Illinois-licensed property/casualty industry as a whole over the past five years.

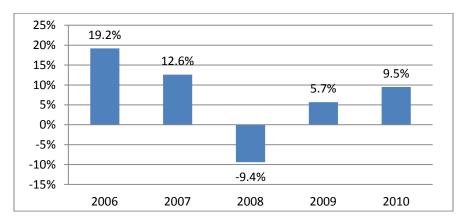

Change in Policyholders' Surplus (2006 – 2010)

Another measure of overall profitability is return on policyholders' surplus. This ratio measures a company's overall profitability from underwriting and investment activity after taxes. It represents the financial cushion that protects policyholders in case of unexpectedly high claims. The return on Policyholders' surplus is determined as the sum of the net income after dividends, taxes, and unrealized capital gains divided by the average of the current year and prior year's policyholders' surplus.

The following chart summarizes the aggregate return on policyholders' surplus from 2006 through 2010 for the overall Illinois-licensed property/casualty industry. As reflected below, the dramatic decreases experienced during 2008 have all but been reversed over the past two years.

Return on Policyholders' Surplus (2006 – 2010)

Source: NAIC State Data Network

The following table provides a summary of income from investments, net income, unrealized capital gains/losses and policyholders' surplus from 2006 to 2010 for all property casualty insurers licensed in Illinois. As referenced above, the economic and market conditions during 2008 significantly affected unrealized Capital Gains (Losses) and the surplus overall by extension.

Net Investment Income Earned, Net Income, Unrealized Capital Gains/Losses and Policyholders' Surplus (in millions)

	2006	2007	2008	2009	2010
Net Investment gain	\$53,434	\$59,558	\$32,268	\$36,798	\$54,172
Net Income	61,230	56,685	6,578	28,520	38,722
Unrealized Capital Gains/Losses	28,677	8,131	(53,876)	28,925	13,800
Policyholders' Surplus	498,408	531,200	470,670	529,402	572,767

Source: NAIC State Data Network

UNDERWRITING EXPERIENCE

The following table identifies the aggregate underwriting gain/loss for Illinois-licensed insurers from 2006 - 2010. As reflected below, the decrease in earned premium was the main force responsible for the posting of negative net underwriting gains.

Aggregate Net Underwriting Gain (Loss) (in millions)

	2006	2007	2008	2009	2010
Premiums earned	\$359,332	\$362,387	\$361,832	\$348,552	\$345,602
Losses incurred	191,391	205,225	241,197	211,845	212,975
Loss expenses incurred	42,950	42,990	41,872	43,006	43,075
Other underwriting expenses Incurred	96,724	98,687	98,441	96,373	97,794
Dividends to policyholders	<u>2,540</u>	<u>1,359</u>	<u>1,146</u>	<u>1,375</u>	<u>1,432</u>
Net underwriting gain/loss	<u>25,727</u>	<u>14,126</u>	<u>(\$20,824)</u>	<u>(\$4,047)</u>	<u>(\$9,674)</u>

INVESTMENT INCOME

One component of surplus is income derived from investments. The net investment income ratio measures income from invested assets relative to earned premiums. It is calculated by dividing net investment income (income from invested assets less investment expenses and depreciation on real estate) by earned premium.

The following chart shows the net investment income ratio for Illinois-licensed property/casualty insurers during the last five-year period. This ratio indicates the investment income component of overall profitability.

Net Investment Income Ratio (2006 – 2010)

INSURANCE REGULATION PRINCIPLES

Although the Department cannot guarantee an Illinois-licensed insurer's profitability, we do monitor the financial solvency and strength of Illinois-licensed insurers in several ways including:

- Maintaining a staff of trained accountants and specialists trained to identify a company's developing financial difficulties. The Department can then take steps to minimize potential losses to Illinois policyholders;
- 2. Working closely with insurance companies with identified financial difficulties to minimize potential risk to policyholders, while attempting to resolve manageable problems or determine the need for rehabilitation or liquidation;
- 3. Employing field examiners for on-site evaluation of insurance company financial records:
- 4. Reviewing operations and compliance issues through scheduled, targeted, and special exams of known or suspected problems;
- 5. Maintaining a staff of actuaries who monitor the adequacy of loss reserves, cash flow testing, and proper valuation of assets;
- 6. Licensing and registering the many types of insurers, surplus lines producers, and risk sharing pools authorized by the Illinois Insurance Code and related Acts; and
- 7. Investigating unauthorized organizations or individuals thought to be conducting illegal insurance operations and taking regulatory action to remove them from the market to protect consumers from fraudulent activities.
